2 Slot Wall Mount Enclosure

PRODUCT OVERVIEW	-
Product Description	2 Slot Wall Mount Enclosure
Product Overview	Wirewerks' wall mount panels are designed for enclosed wall mounting of adapter strips and splice trays or distribution modules. They are fabricated from steel sheets and fin shed with a light textured black powder coat. These panels are easily mounted to any wall using the internal mounting holes. Adapter strips or modules are snapped into the panels with 2 push pins and incoming fiber is connected to them. Patch cords are used to connect these fibers as required, to active equipment or other patch panels from the side of the panel. These panels include fiber management features for slack management of incoming cables. APPLICATIONS: Entrance Facility Data Centres Telecommunications or Equipment Room Consolidation Point
Package Qty.	1

PRODUCT FEATURES	-
Features	• Secure and effici t Splicing and termination. • Effective slack management with proper attachement points. • Plastic management spools for a better fiber bend radius control. • Grommet entry & grounding. • Better adapter strip positioning to ease the patch cords access. • Lockable-restricted entry of unauthorized access (Locks are Optional)
