IP Video Systems

IP-Surveillance systems are relatively new to the market. In a typical IP- based video surveillance system, network (IP) cameras are connected directly to the Local Area Network (LAN) and transport digital video across the IP network via UTP cabling and switches, recording video to any PC or server on the network. Since the cameras are IP addressable, they are able to be accessed from anywhere in the world, provided the user has the sufficient network access and security privileges.

Benefits of Using Fiber Optics in Video Security and Surveillance

In the ever increasing reach of today's video security and surveillance systems, many security professionals are finding that the quality, bandwidth and distance needed to perform even the most basic surveillance is beyond the reach of coaxial and UTP cabling. In fact, even though IP-based video security systems are gaining popularity, they face a serious distance limitation of 100 meters (328 feet) or less over UTP cabling infrastructure. This poses an insurmountable hurdle when trying to monitor the many outreach locations of a typical surveillance installation. While fairing slightly better in copper distance limitations, most analog-based CCTV systems prove effective and economical only if the coaxial cabling runs are held to less than 750ft (228m). Utilizing coax beyond that distance, however, poses a number of problems, some of which are not immediately obvious. For instance, let's say your monitor is located 1,000 ft (304 m) from the camera. In that scenario, without any active signal conditioning, approximately 37-percent of the high frequency information will be lost in transmission, providing a seriously degraded image. In fact, since you cannot see information that is not there, you may not even realize that information has been deleted. To accommodate lengths greater than 750 feet (228 m) on a coax infrastructure, you must make certain that some provision has been made to guarantee the video signal's transmission strength such as the use of signal amplification, ground fault correction and surge protection. Installing these items will inevitably increase the cost of the system considerably, making alternative cabling methods more attractive. In fact, the use of fiber optic cable will allow for cable runs of over 1500 meters (5,000 feet) on multimode and distances of over 10km (6.2 miles) on single mode cable. In addition to distance extension, fiber optics also presents a number of other unique benefits not present in either coax or UTP cabling:

- Smaller size and better tensile strength making it easier to install when pulling through conduit or in overhead cable trays
- High degree of security as fiber is inherently difficult to tap into or interfere with
- Immunity to electrical interference such as:
 - o Electromagnetic interference (EMI)
 - o Radio frequency interference (RFI)
 - o High voltages found in fluorescent lights, card access door strikes and outdoor lighting systems
 - o Induced voltages (ground loops) which causes picture distortion and audio interference
- Higher bandwidth
- Improved reliability and overall transmission performance.

Local area networks (LANs) very commonly deploy fiber optics as the network backbone between buildings or in vertical risers of multi-story buildings. Utilizing this infrastructure already in place would be an attractive transmission alternative to risking the distance and quality issues common to coax and UTP video systems. Accessing this fiber optic cabling can be a challenge for most video security professionals as the majority of new cameras and monitors on the market today are not available with fiber optic ports on them. In addition, most existing video security and surveillance systems were designed and installed with coax or UTP cabling. To improve the quality, bandwidth and distance of these existing systems by transporting the video on fiber optic cabling, a method is required to convert the electrical video signal over to an optical format.

IP video conversion:

- Ethernet Media Converters – powered devices that convert an IP- based video signal on UTP over to a fiber optic medium
- Power over Ethernet (PoE) Media Converters – powered devices that convert an IP-based video signal UTP over to a fiber optic medium, as well as inject the power onto the UTP necessary to power remote IP cameras.

Media converters come in a variety of form factors and sizes ranging from miniature, stand-alone devices that attach directly to a camera to managed, chassis-based devices allowing for full SNMP monitoring and management of the media converters.

In addition to providing a means for transparently connecting one type of media to another, media conversion can provide a cost-effective method **for** integrating a hybrid video security and surveillance system into one, seamless and manageable entity. Imagine the cost savings that can be realized by utilizing an existing, analog-based CCTV infrastructure, while implementing the latest technology of IP-based cameras for specialized video capture, storage or analysis as well as additional surveillance locations.

Ethernet Switch

Ethernet Media Converters

Ethernet Switches | Managed & Unmanaged

Our complete line of Ethernet Switches supporting installations from Enterprise businesses to small offices. Gigabit Ethernet, Fast Ethernet and Standard Ethernet requirements can be met by the wide array of solutions offered. Support of new Quality of Service and Tagged Virtual LAN protocol capabilities permit the construction of convergent networks supporting voice, data, video and still image transport simultaneously over a single structured cabling plan.

MANAGED ETHERNET SWITCHES	
065-7861	26 Port Stackable - Gigabit - 4 SFP Dual Media Ports
065-7861POE	26 Port Stackable - Gigabit - 4 SFP Dual Media Ports PoE
065-7861POE-FP	26 Port Stackable - Gigabit - 4 SFP Dual Media Ports PoE+
065-7726S	24 Port 10/100 Fast Ethernet - 2 SFP RJ-45 Ports
065-7734R	24 Port 10/100 - Redundant Power
065-777344TR	24 Port 10/100 SFP Slots + 4 10/100/1G TX Dual Media Ports with 1000Base SFP slots and Redundant P.S.
065-77344DMR	24 Port 10/100B SFP Slots + 4 10/100/1GT/TX Dual Media Ports w/1000Base SFP Slots and Redundant PS- Managed Switch
065-7734FSFPR	24 Port 100B SFP Slots + 4 10/100/1GT/TX Dual Media Ports w/10/100/1000Base SFP Slots and Redundant PS-
065-7726POE	24 Port 10/100 Managed Switch PoE - 2 SFP/RJ45 Dual Media Ports
065-7726POE-FP	24 Port 10/100 Managed Switch Full Powered PoE 2 SFP/RJ45
065-7904-W5	24 Port 10/100/1000 WebSmart Switch - 4 SFP Dual Ports

ADD: H To the end of the P.N. for Hardened Temperature Ranges: -40°C - 85°C

UNMANAGED ETHERNET SWITCHES	
065-7308POE-FP	8 Port 10/100 Full Power PoE Switch w/ 8 PoE Port
065-7308POEFPRM	Rack Mount Kit for 065-7308POE-FP
065-7310SC	8 Port 100BaseFX MM/SC Unmanaged Fiber Switch
065-7331A	16 Port 10/100T/TX Unmanaged Switch
065-7341A	24 Port 10/100T/TX Unmanaged Switch
065-7007A	5 Port 10/100BaseT/TX Mini Switch
065-7012A	8 Port 10/100BaseT/TX Mini Switch

SFP SMALL FORMED FACTOR PLUGS- 2 STRAND SFP GIGABIT ETHERNET	
065-795XMG	1000BaseSX SFP Module 850nm - MM/LC - 220m
065-795XEDMG	1000BaseLX SFP Module 1310nm MM/LC - 2km
065-79LXMG	1000BaseLX SFP Module 1310nm SM/LC - 10km
065-79LXEDMG	1000BaseLX SFP Module 1310nm SM/LC - 40km
065-79ZXMG	1000BaseLX SFP Module 1550nm SM/LC - 80km

FAST ETHERNET AND GIGABIT COPPER SFP MODULES	
065-73TXMG	10/100BaseT/TX SFP- RJ45 100m
065-791000TMG	1000BaseT SFP - RJ45 - Cat5E or Better 100m

WEST PENN WIRE OFFERS EVERY VERSION OF ETHERNET SWITCHES FROM SIGNAMAX.

Media Converters | Managed & Unmanaged

West Penn Wire (SignaMax) provides media conversion solutions that support data, voice, video and image transport over a wide variety of transmission media. These products convert a wide variety of data - from serial RS-232 through Standard, Fast, Gigabit Ethernet and SONET/SDH protocols. Conversions from twisted-pair copper cable, coaxial cable, multimode fiber and singlemode fiber, to other types of cable are all possible with the wide array of solutions from Signamax Connectivity Systems

UNMANAGED MEDIA CONVERTER - STANDALONE OR CHASSIS MOUNT	
065-1100	10/100BaseT TX to 100BaseFX MM ST - 2Km
065-1110	10/100BaseT TX to 100BaseFX MM SC - 2Km
065-1174	10/100BaseT TX to 100BaseFX MM LC - 2Km
065-1120	10/100BaseT TX to 100BaseFX SM SC 15km
065-1100FS	10/100BaseT TX to 100BaseFX MM ST USB power option
065-1110FS	10/100BaseT TX to 100BaseFX MM SC USB power option
065-1174FS	10/100BaseT TX to 100BaseFX MM LC USB power option
065-1120FS	10/100BaseT TX to 100BaseFX SM SC 15km USB power option
065-11DINMT	16 Bay DIN Rail Mount Brackets for 065-11xx converters
065-11965FPDR	10/100/1G BaseT TX to 100BaseFX SFP Dual Rated 100MB or 1G Base

UNMANAGED 10/100 BASET TX TO 100BASE FX MINI - STANDALONE	
065-1000	10/100BaseT TX to 100BaseFX MM ST Mini Converter MM 2km
065-1010	10/100BaseT TX to 100BaseFX MM SC Mini Converter MM 2km
065-1020	10/100BaseT TX to 100BaseFX MM SC Mini Converter SM 15km

UNMANAGED 10/100 BASET TX TO 100BASE FX PoE - PSE Power Source Equipment	
065-1050ST	10/100BaseT/TX to 100BaseFX PoE (PSE) Media Converter ST MM 2km
065-1050SC	10/100BaseT/TX to 100BaseFX PoE (PSE) Media Converter SC MM 2km
065-1050SM	10/100BaseT/TX to 100BaseFX PoE (PSE) Media Converter SC SM 15km

UNMANAGED 10/100 BASET TX TO 100BASE FX PoE - PD Powered Device	
065-1052SC	10/100BaseT/TX to 100BaseFX PoE (PD) Media Converter STC MM 2km

ETHERNET EXTENDER MEDIA CONVERTER	
065-1167	10/100BaseT/TX Ethernet Extender Media Converter
065-1167DIN	10/100BaseT/TX Ethernet Extender Media Converter- Pre-attached DIN rail

RACK MOUNT MEDIA CONVERTER CHASSIS	
065-1185	16 Bay Rack Mount Media Converter Chassis, AC for the 065-11xx Series

INDUSTRIAL DIN-RAIL RACK MOUNT	
065-18TR	19" DIN-rail Mount for Hardened Products

WEST PENN WIRE OFFERS EVERY VERSION OF MEDIA CONVERTERS FROM SIGNAMAX.
NOTE: NO INDUSTRIAL MEDIA CONVERTERS ARE LISTED, PLEASE CONTACT WEST PENN WIRE FOR INFORMATION ON THIS PRODUCT LINE.

IF YOU DO NOT SEE THE PRODUCT YOU ARE SEARCHING FOR - PLEASE VISIT www.signamax.com AND CONTACT WEST PENN WIRE

Bulk Cable | Category 5E UTP

Category 5E | UTP

Standard Spool Size: 1000ft

Features:

- TIA-EIA Category 5E Cable
- NEC Type CMR and CMP
- (UL) Listed: UL1666 and NFPA262
- Meets 300V requirements as specified in the NEC

Applications:

- Indoor for:
- 10/100Mb Data
 - Horizontal Cabling
 - Voice Backbone
 - AV Digital Video
 - Digital Integration

Bulk Cable | Indoor/Outdoor Fiber Optic

Fiber Optic | OFNP

Features:

- NEC OFNP
- Available in SingleMode or MultiMode
- Distribution Design
- Corning Fiber
- Indoor/Outdoor Plenum Rated
- All environments in ONE DESIGN

Applications:

- Indoor for:
- Backbone Cabling
 - AV and Security
 - Data/Networking
